

- 1 b** There is NO way to speed up the process of ridding the body of alcohol.  
Caffeine will keep you awake longer but will not cancel the effect of alcohol.
- 2 c** ANY alcohol will reduce your driving skills.
- 3 c**
- 4 c**
- 5 c**
- 6 b**
- 7 a** Your reaction times will be longer.
- 8 c**
- 9 a** Even if you plan to not drink much, when you start drinking the alcohol will affect your judgment and you will try to drive even though it is not safe.  
Do not take your car, and do not get a lift home with a driver who has been drinking.
- 10 a**
- 11 a** You are responsible for finding out if taking any substance (including medicine from a doctor) will affect your driving. Ask the doctor or pharmacist, read the label ("do not operate machinery" includes "do not drive").
- 12 c**
- 13 c**
- 14 a**
- 15 c** 0.00 is also called "Zero Blood Alcohol" (ZBAC).
- 16 b**
- 17 a**
- 18 a** "Zero Blood Alcohol" (ZBAC).
- 19 b** Saying that you didn't know the medicine would affect your driving is NOT a valid excuse in a law court.
- 20 b**
- 21 c** "Prescription medicine" is prescribed by doctors specifically for their patients and must NOT be given to anyone else.
- 22 b**
- 23 b**

Note: Driving while affected by alcohol or drugs is the biggest causes of road crashes.
